

**MEASURING STICKS**

# MEASURING STICKS

Originally designed as a cost effective instrument for measuring pit props, the Uni Rod Measuring Stick has become the standard for a multitude of applications above and below ground that require an accurate method of taking measurements. Consider the Uni Rod features against timber sticks, metal rods or for that matter measuring tapes.

## DURABLE

- + Heavy duty minimises breakage.

## RECOVERABLE

- + Neither corrodes nor decays, even over extended periods.  
Combine this with the bright orange colour, losses are minimised.

## DESIGN FEATURES

- + Double locking rings that also serve as wipers to maintain smooth operation.

## SIMPLE OPERATION

- + Quarter turn twist lock action.
- + Lightweight and easy to carry.

## ACCURATE

- + Also available in graduated 1mm increments for procedures requiring multiple accurate measurements.

Please see below standard sizing and part codes. Please note variations available on request.

Seam Height	Measuring Stick Part Code
1.4m to 2.7m	ZCMSS
2.0m to 3.3m	ZCMSL
2.0m to 3.9m	ZCMSXL
2.7m to 4.6m	ZCMSXLX
