VLI DIAGONAL PLOUGH

VLI's diagonal ploughs are an economical innovative approach keeping debris away from conveyor pulleys. Our diagonal ploughs are uni-directional, self-adjusting and maintenance free, riding on the belt under its own weight, pushing the debris off to either the left or right of the conveyor.

Installation of the plough is straight forward requiring only basic tools to anchor the restraining chains in place. Our ploughs are suitable for all conveyor applications including surface operations and underground coalmines with the benefit of being able to run on clipped and spliced conveyor belts.

Manufactured from FRAS Polyurethane, these ploughs are long lasting have been installed on belts up to 4.5m/s. Our ploughs are suitable for belt widths from 1200mm up to 2000mm and can be supplied to either push the debris off to the left or right of the conveyor.

MODELS AVAILABLE

Belt Width	1200	1500	1600	1800
Width (mm)	1340	1686	1828	1990
