

STONE DUSTERS

STONE DUSTERS

The VLI range of Stone Dusters feature two different mobile models, both of which are man portable and pneumatically operated. These units are designed for belt-roads and face dusting or areas otherwise inaccessible for large equipment.

Uni Duster/Cone Duster

- 30kg bag capacity
- Carry handle for easy mobility
- bag breaker
- Supplied complete with 4m FRAS hose and camlock fittings

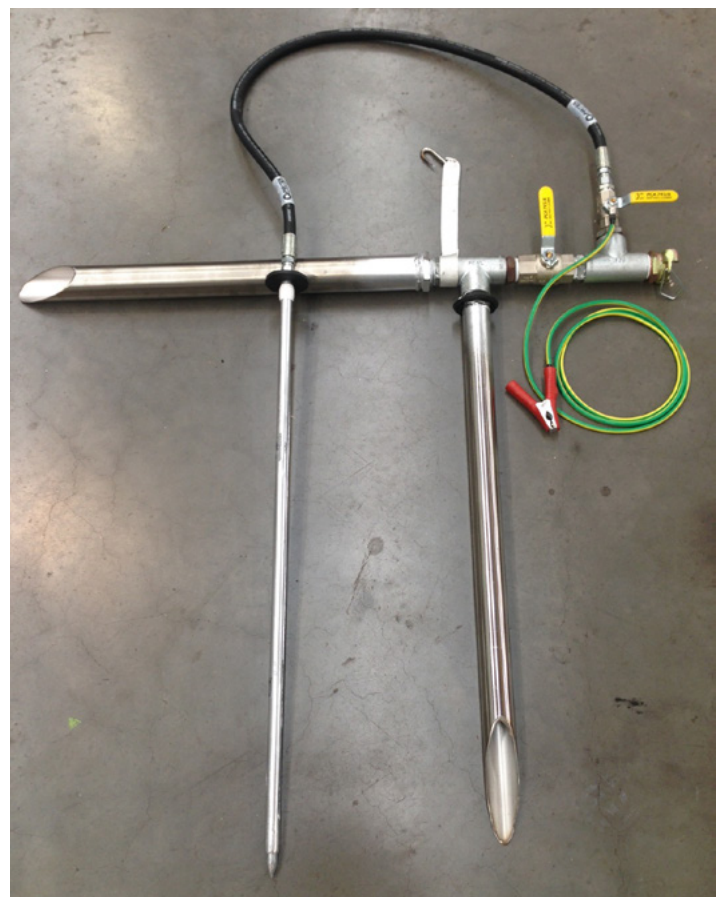

FRAS Polyurethane cones available as an alternate. All components including spare hoses and fittings are available as spare parts.

VLI Part Code-ZSDUNIDUST

Spear Duster/Dust Muncher

- Can deliver a continuous supply of stone dust to the exhaust side of the auxiliary fan
- Complete with earth lead
- Easy installation
- The unique aerator wand breaks up the coning in the bulk stone dust bag, resulting in the majority of stone dust contained in the bag being expelled
- Method of operation is on a venturi principle
- Eliminates the necessity of 20kg stone dust bags at the auxiliary fan site (no lifting, no rubbish)
- A 2" bull hose may be used to direct the dust to the required location
- Safety advice label attached
